NAHUEL CITTADINO

Full Stack Developer | React · Next.js · TypeScript | Frontend Specialist

Turin, Italy | LinkedIn | Portfolio | GitHub | Email

PROFILE

Full Stack Developer specialized in frontend development, building responsive, maintainable web applications with React, Next.js and TypeScript. Experienced across the full product lifecycle, from reusable UI and API integration to backend services, databases, testing and production deployment. Focused on user experience, performance and building products that solve real-world problems.

PROFESSIONAL EXPERIENCE

Entienda y Aprenda — Remote / Argentina
Full Stack Developer — Jan 2025 - Present

- Led the platform migration from Python to Next.js and built the public experience, including landing pages, cascading subject search and tutor profiles.
- Developed booking flows with availability slots, timed holds, pricing and rescheduling, plus student/tutor dashboards, chat, payments and ratings.
- Built an admin panel with 14+ data tables, filters and server-side sorting; added email verification, rate limiting, PWA support and automated testing with Vitest, RTL, MSW and Playwright.
- Stack: Next.js, React, TypeScript, Flask, PostgreSQL and Docker.

42i — Buenos Aires, Argentina
Full Stack Developer — Sep 2023 - Apr 2024

- Built and maintained web application features, collaborating on software design, implementation, testing, deployment and documentation.
- Diagnosed and corrected application issues while working with JavaScript/TypeScript, React, Node.js and SQL-based data flows.

Henry — Buenos Aires, Argentina
Full Stack Teaching Assistant — Sep 2022 - Apr 2023

- Supported Full Stack Web Development students with exercises, debugging and pair programming; coordinated study groups and collaborative problem solving.

SELECTED PROJECTS

Torino City Intelligence - Interactive Turin map and data-driven tool for evaluating potential café locations. | Live deploy
Athenas Club - Responsive sportswear ecommerce application focused on product browsing and modern UI. | Live deploy
Taste in Moods - Interactive music discovery experience combining web development with structured emotional data. | Live deploy
